

Posgraduate in Water & Energy & City. *Leading the Future*

INDEX

- 1. Context**
- 2. Objectives**
- 3. Proposal**
 - Structure**
 - Water Module**
 - Energy Module**
 - City Module**

Context

- Integration of three essentials in actual human life: water, energy and cities: How smart **cities** deliver urban services as **water** and **energy** in the digital era, requires an integral approach according the new era.
- No one professional specialist is actually trained for lead the actual complex holistic scenario: Facing the **update of Civil engineering education** and according to the needs of nowadays society, companies are searching for civil engineers with additional multidisciplinary skills.
- In order to prepare versatile civil engineers to **changing realities**, without change the existing official educational program (degree and master degree).
- For this purpose a **Committee** has been constituted between School of Civil Engineering and CICCP Professional Association of Civil Engineers.

Context

- To put it bluntly:
- This is not “another” postgraduate module. It was structured and intended for professionals who, in the near future, will be requested to provide solutions. under the framework of **design thinking**, to challenges and problems that society will face, in the context of:
 - Population growth and massive concentration in urban areas
 - Water management in scarcity scenarios of climate change
 - Energy demand and its transition to more sustainable clean energy deliver

Context

- Why should I have to take this courses?
- → Added Value:
 - Taught by experts of the different entities supporting this module
 - Chance to deal with more real than academic engineering problems
 - The **possibility** to carry out practices at the entities (depending on the student performance/company needs)
 - The final project could be the starting point of the TFM
 - Recognition of 15 out of 30 ECTS of the compulsory practices
 - Module mostly funded by the entities, so the registration fee is quite affordable

Objectives

- Promote basic principles for sustainable coexistence with a rational use of ***advanced and efficient urban services***.
- The program will focus on ***urban system's complexity*** across the globe and its own metabolism: cities as privileged places in exchange for sharing.
- The program will examine the fundamental issues necessary to ***deliver city's water & energy needs*** along the maintenance or transforming processes during non stop city life.
- Learners will be provided with the ability to avoid and manage critical situations and implement new technical projects in ***changing scenarios, within a multidisciplinary approach***.

Proposal

- Develop a **postgraduate degree** in Water, Energy and City.
- Optional postgraduate program of **15 ECTS**.
- **Complementary** program to the official Degree and Master of the School of Civil Engineers.
- Program promoted by **companies** through:
 - Committee (scholarship program, candidate selection).
 - Given lessons by business professionals, public technical officials and academic professors.

Proposal

Postgraduate proposed structure:

**4 ECTS
WATER**

**4 ECTS
ENERGY**

4 ECTS CITY

3 ECTS TRANSVERSAL

Water Module > New Water Scenario

- Why?
 - New trends and key challenges in water sector.
 - Complement the hydraulic engineering and treatment processes developed in the Master, with a management vision on technical, economical, social and sustainable water exploitation and distribution.
 - 4 ECTS (100 h)
 - Contents:
 - Advanced Operations in water services
 - Water Services Management
 - Water, Energy & City: From a Water View
 - Customer value management and Commercial processes (**online*)

* online ECTS could be directly transferable for those student who wish to pursue the Master in Technology and Water Management – online (60 ECTS).

Water Module > New Water Scenario

Title	Content	ECTS
Bloque 1: Water, Energy & City desde la Perspectiva del Agua	<p>Presentación del módulo Water y visión general del bloque 1</p> <p>1.1. Configuración del servicio de abastecimiento y saneamiento de agua. Modelos de entrega</p> <p>1.2. Precio del agua e sistema innovativo de tarifa. Recuperación de costes a través de la precio del agua. (Caso 10: Modelo de tarifa de Barcelona)</p> <p>1.3. Visita 5: Visita guiada al Centro de Control Operativo y al Laboratorio de calidad de agua</p>	1.2
Bloque 2: Operaciones Avanzadas en el Ciclo Urbano del Agua	<p>Presentación general del bloque 2</p> <p>2.1. Operación integral, eficiencia operacional, industria 4.0 en las operaciones del agua</p> <p>2.2. Resiliencia y gestión del agua en situaciones extraordinarias. Escasez de recursos y gestión de sequías (Caso 11: estudio de caso Barcelona)</p> <p>2.3. Watergy. Recursos energéticos en el ciclo del agua. Gestión energética eficiente en el ciclo del agua (Caso 12: biofactoria)</p> <p>2.4. Visita 6: visita guiada EDAR Baix Llobregat: a referenced covered and urban integrated WWTP</p>	1.5
Bloque 3: Creación de Valor para el Ciudadano	<p>3.1. New engagement dynamics between administration and citizens</p> <p>3.2. Ciclo comercial y back office de un servicio urbano (Caso 13: gestión del ciclo comercial de una operadora de agua)</p>	1.3

Energy Module > New Energy Scenario

- Why?
 - New trends and key challenges in energy sector.
 - Complement the energy engineering and treatment processes developed in the Master, with a management vision on technical, economical and social energy exploitation.
 - 4 ECTS (100 h)
 - Contents:
 - Advanced Operations in energy services
 - Energy Services Management
 - Water, Energy & City: From a Energy View
 - Customer value management and Commercial processes

Energy Module > New Energy Scenario

Title	Content	ECTS
Bloque 1: Water, Energy & City: Perspectiva Actual	Introducción. Conceptos Básicos. 1.1. Transición energética 1.2. Eficiencia Energética	1.5
Bloque 2: Perspectiva futura: evolución y gestión avanzada de la demanda energética	2.1. Transformación digital en la energía 2.2. IoT y el Sector Energético 2.3. Generación distribuida	1.5
Bloque 3: Perspectivas de futuro: Sostenibilidad, Medio Ambiente y Perspectivas Ciudadanas.	3.1 Smart Grids 3.2 Vehículo eléctrico	1.0

4 ECTS WATER	4 ECTS ENERGY	4 ECTS CITY
3 ECTS TRANSVERSAL		

City Module > New City Scenario

- Why?
 - New trends and key challenges in urban sector.
 - Complement the urban engineering and treatment processes developed in the Master, with a management vision on technical, economical and social city exploitation.
 - Intensive use of city scenarios for learning.
 - 4 ECTS (100 h)
 - Contents:
 - City tours across the main scenarios analyzed
 - Water, Energy & City: From a City View
 - Other Significant City Services Management
 - Urban transversal management

4 ECTS WATER	4 ECTS ENERGY	4 ECTS CITY
3 ECTS TRANSVERSAL		

City Module > New City Scenario

Title	Content	ECTS
Bloque 1: Water, Energy & City desde la perspectiva de la Ciudad	<p>Presentación del módulo de City y visión general del bloque 1</p> <p>1.1. Ciclo del agua en los sistemas urbanos: historia, nuevas tendencias y proyectos (Caso 1 - Uso inteligente del agua subterráneo)</p> <p>1.2. Sistema de distribución de energía en la ciudad: generación renovable y consumo eficiente (Caso 2: Promoción de las energías renovables.)</p> <p>1.3. Movilidad eléctrica: Solución integrada en energía y movilidad (Caso 3 - Barcelona y la red de suministro de energía para vehículos eléctricos)</p> <p>Visita 1: Colector subterráneo de aguas de la lluvia</p>	1.4
Bloque 2: Gestión de otros Sistemas de Servicios Urbanos	<p>Presentación general del bloque 2</p> <p>2.1. ITC aplicado a los servicios urbanos: Contexto global, funciones públicas y perspectivas (Caso 4 - Creación de un plataforma abierta relacionada con la resiliencia urbana)</p> <p>2.2. Servicios de movilidad: máxima accesibilidad sin accidentes, contaminación y atascos (Caso 5 - Transformando el escenario mediante ciclismo urbano y PEV (Plug in Electric Vehicle))</p> <p>2.3. Limpieza urbana y colecta de basura: completando el ciclo de la materia (Caso 6 - Optimización del proceso de limpieza de la ciudad de Barcelona)</p> <p>Visita 2: Visita guiada a la planta de incineración del Besòs</p>	1.3
Bloque 3: Gestión Transversal de la Ciudad	<p>Presentación general del bloque 3</p> <p>3.1. Gestión de servicios urbanos: 25 años de trabajo colaborativo (Caso 7 - Implementación de la innovación y control de calidad en servicios urbanos)</p> <p>3.2. Obras públicas urbanas: transformando y manteniendo la ciudad (Caso 8 - Repensando la ciudad: superillas)</p> <p>3.3. Resiliencia urbana: concepto, evolución y mejora (Caso 9: City Resilient Profiling Program CRPP)</p> <p>3.4. Visita 3: Proyectos de transformación de Barcelona: Glories</p>	1.3

Transversal Module > Implementing Management

- Why?
 - Development of transversal skills.
 - Practical business management concepts.
 - 3 ECTS (75 h)
 - Contents:
 - Innovation, entrepreneurship and digital transformation.
 - Managing and developing teams.
 - Corporate social responsibility and Ethical behavior in business.
 - Health and safety in Business environment.

Transversal Module > Implementing Management

Title	Content	ECTS
Gestión, Design Thinking, Innovación y Proyecto Final	4.1. Nociones básicas sobre gestión de equipos, gestión de conflictos, implementación de la innovación y liderazgo. 4.2. Proyecto final	0.5 2.5

Transversal Module > Implementing Management

• Final Postgraduate Project

- Development of a multidisciplinary project in groups of 3 students.
- Ensuring that the 3 vectors are taken into account.
- Example: Urban Resilience facing emerging crisis: water (flooding, scarcity...) – Energy (power outage...) – City (transport, health...)

• Mentoring

- Mentoring by senior civil engineers.
- Learning through experience and professional guidance.

General Information

- ✓ **Degree:** Postgraduate diplomas issued by the Universitat Politècnica de Catalunya.
- ✓ **Credits:** 15 ECTS (150 teaching hours)
- ✓ **Start date:** March 2018
- ✓ **Timetable:** Tuesday to Thursday, 18:30h to 21:30h
- ✓ **Method:** Blended learning
- ✓ **Course Location:** ETSECCPB
- ✓ **More information:** Isabel de la Fuente
E-mail: isabel.delafuente@talent.upc.edu
phone: (34) 93 112 08 83

The image shows a digital brochure for the Postgraduate in Water, Energy & City. At the top, it says "POSGRADO EN WATER, ENERGY & CITY" and "LEADING THE FUTURE". Below this, there is a section about the collaboration between the Ajuntament de Barcelona, Gas Natural Fenosa, and Agbar. It highlights the program's focus on smart cities and intelligent resource management. The program is divided into four modules: Agua (Water), Energia (Energy), Ciudad (City), and Conocimientos Transversales (Transversal Knowledge). The brochure also provides basic information such as the academic director (Sergio Pilarini), credits (15 ECTS), and application dates. It ends with a call to action to register for an information session.

Registration Process

Welcome

We welcome you to the UPC School of Professional & Executive Development and thank you for your interest in the Postgraduate course **Water, Energy & City. Leading the Future.**

We are also pleased to inform you that the programme technician will be available to provide you all the information on the course and solve any queries you may have.

>Do you have a query?

>Do you wish to continue with the registration?

If you wish to continue with the **registration**, click on the next button:

We would like to remind you of programme's basic information:

Name: Water, Energy & City. Leading the Future

Course type: Postgraduate course (Semi-distance)

Academic Director: Octavio César Mössö Aranda

Duration: 15 ECTS (184 teaching hours)

Course dates: From 06-02-2018 to 05-07-2018

Timetable:
Tuesday 18:30 to 21:30h
Wednesday 18:30 to 21:30h
Thursday 18:30 to 21:30h

Price: €2000

Programme Technician: Isabel de la Fuente Larriba (Tel.:931120883)

ADMISSION PROCESS

Water, Energy & City. Leading the Future

1 PERSONAL DETAILS

2 REQUIRED DOCUMENTATION

3 ADMISSION CONFIRMATION

In order to start with the registration we require some personal data. If you have already provided this information but it is not correct, you can make any necessary modification or update it.

PERSONAL DETAILS

Name *:

Surname(s) *:

El nombre y los apellidos han de coincidir con los del NIF / pasaporte / NIE

Date of birth *:

Nationality *:

Gender *:

Document type *:

NIF

NIF/passport/NIE *:

Address :

ADMISSION PROCESS

Water, Energy & City. Leading the Future

1 PERSONAL DETAILS

2 REQUIRED DOCUMENTATION

3 ADMISSION CONFIRMATION

To continue with the registration process you are required to attach the requested documents. If you have already attached the documents, please make sure they are updated and that they meet the requirements for the course you wish to register for.

Once you have attached the documents click on "Accept and Continue" to continue with the process.

DOCUMENTATION

CURRICULUM VITAE *

Max: 10 MB. Tipus: doc,docx,pdf

ADMISSION PROCESS

Water, Energy & City. Leading the Future

1 PERSONAL DETAILS

2 REQUIRED DOCUMENTATION

3 ADMISSION CONFIRMATION

To complete the registration process for the programme and so we can assess your candidacy you are required to make a payment of €110 for the course registration fees (this fee will be deducted from the full course fee). Once you have made this payment you will receive an email confirming the payment has been processed. After that we will study your application and, if you are admitted onto the course, we will send you the letter of admission. You will find all the information required for enrolment in this letter.

Please accept the economic and academic policy of the UPC School to continue with the process and then click "Pay the registration fee".

ONLINE REGISTRATION FEES PAYMENT

I have read and accepted [academic and financial regulations](#) and [the date protection policy](#) of the School of Professional & Executive Development

Pay the registration fee

Send us your query

You can also get in touch at any time:
Isabel de la Fuente Larriba
931120883

Application Process

- RECEIVE THE APPLICATION FORM
- SENT THE DOCUMENTS TO ACADEMIC MANAGEMENT
- PROFILES EVALUATION COMMITTEE
(the committee may consider conducting a personal interview)
- ADMISSION
- SENT THE NOTICE OF ADMISSION
PAYMENT THE REGISTRATION FEE

THANK YOU
